

Time Machine VI Mobile App Installation and setup

Installing the NVMS7000 App

On your mobile device go to : the App Store for iPhones or the Google Play store for Androids. Search for NVMS7000. Select and install the app. Once installation is complete, open the app and select your region.

Adding your recorder to the NVMS7000 App

Step 1

Touch the logo on the upper left of the app to open the main menu

Step 2

Select "Devices"

Step 3

Touch the upper right corner "folder" and then select "Manual Adding"

Step 4

Using information provided by your installer fill in the required information:

1. Enter the alias, or a name you recognize
2. Address: _____
3. Port: **8000**
4. User Name: _____ (user/admin)
5. Password: _____ (12345)

Save your setting by clicking the disk icon in the upper right corner.

Then click "Start Live View"

Alias		⊗
Register Mode	IP/Domain	>
Address		⊗
Port	8000	⊗
User Name		⊗
Password		⊗
Camera No.	0	

Start Live View

Navigating the NVMS7000 App

Select viewing options here. Select from single camera to 16 camera viewing.

Stop video stream to your device

Save a snapshot to your device

Record video stream to your device

Adjust the video quality. By default the video will play at "fluent" quality. This feed is usually not as clear as you actual system. You can further clear up the image quality by changing this setting to Clear.

Swipe bottom menu for additional option

Digital Zoom Click here and then you can stretch the video stream allowing you to enlarge the feed viewing deeper within the image

When you are viewing your cameras your device is using internet service. Viewing your cameras over a metered data connection could increase your charges from your mobile provider. A poor data speed connection can affect the quality of the playback and the number of cameras that can be streamed at once.

Remote Playback

Remote Playback allows you to search your system and playback recordings. This feature is designed for simple searches where the time and camera are known. For deeper Smart Searches use the actual DVR system hardware.

From the main app screen choose the NVMS7000 icon in the upper left corner to open the app menu. Choose Remote Playback. Click on the PLUS symbol to load a camera video. Remote playback works best on a WIFI/4G connection viewing one camera at a time.

All copies of video require special a video player found on our website : www.mycarolinasecurity.com/vsplayer

The image illustrates the Remote Playback app interface. It features a main playback screen with a camera feed and a timeline. A 'Camera List' screen is shown with search filters for 'From' and 'To' dates, and a list of cameras including 'Its demo' and 'Its demo2'. A control bar at the bottom includes icons for 'Save Snapshot', 'Recap Video (drag time still stop record)', 'Pause', 'Speed Control', and 'Play / Stop'. A zoomed-in view of a video shows motion detection markers on the timeline, with a text box stating 'These marks indicate motion detection'. A 'Speaker' icon and a 'Digital Zoom' icon are also visible.

NVMS7000 Alarm Feature

Alarm (Push Notification) This feature allows the DVR to communicate with your mobile app. Note: In order to use this feature your DVR system must have motion detection or VCA function and enabled for Surveillance Center.

Enable Motion Detection

Enable Dynamic Analysis for Motion

Area Settings > Arming Schedule > Linkage Method

<input type="checkbox"/> Normal Linkage	<input type="checkbox"/> Trigger Alarm Output
<input type="checkbox"/> Audible Warning	<input type="checkbox"/> D1->1
<input checked="" type="checkbox"/> Send Email	<input type="checkbox"/> D2->1
<input checked="" type="checkbox"/> Notify Surveillance Center	<input type="checkbox"/> D3->1

Once configured in your DVR settings. 1. Click on LTS Logo, and select Alarm from side menu

2. Choose which Camera system to enable Push Notification

3. You'll view an Alarm Linkage in red

Set Alarm Notification

4. Press Alarm Linkage and Choose one of options given.

Set Alarm Notification

Picture and Video

1. With Picture and video Management you can view and manage local video file and pictures that you manually record (clip) and capture in Live View and Remote Playback interface. Pictures and video files are stored in the NVMS7000 app. You can also share pictures and videos.

2. Share or Delete video using the Pencil icon in top right.

All copies of video require special a video player found on our website : www.mycarolinasecurity.com/vsplayer

Help Manual

1. You can find the User Manual from your Mobile App.

2. Go to Menu → Configuration → Help
